Spoke to Alan. He realizes he jumped the gun. He apparently thought you guys were just adopting the 1 hour SO2 standard, not the attainment plan. Staff is reviewing the attainment plan and considering what comments to make. I expect to get briefed next week. Sorry for the confusion.

BTW I heard through the grapevine that you guys are thinking one or more ozone high values for Baton Rouge were the result of exceptional events. Fran will be resending some summary guidance on how to proceed with exceptional event submissions.

Hi...we received a letter from Alan Shar last week that states that Region 6 has reviewed a proposal on St. Bernard Parish and that it addresses all requirements under the Clean Air Act for SO2. Only problem is his letter is dated and was received prior to our submittal of the SIP...he didn't cc anyone on the letter and wrote it to me.

Do you know what this is about? If you want a copy I will scan and send it to you....
